Part of the research described in this thesis was supported by a grant of the Netherlands Foundation of Cardiovascular Excellence (grant 201/06).

Additional financial support by the following sponsors for the publication of this thesis is gratefully acknowledged:

Rijksuniversiteit Groningen, Alere Health BV, Amgen

# Contents

Chapter 1	Introduction and aim of the thesis	9
<b>Part 1</b>	<b>Mechanistic insights in the extra-erythropoietic mechanisms of erythropoietin</b>	
Chapter 2	Erythropoietin in cardiac disease: New features of an old drug <i>European Journal of Pharmacology 2008;585:270-277</i>	23
Chapter 3	Vascular endothelial growth factor is crucial for erythropoietin-induced improvement of cardiac function in heart failure <i>Cardiovascular Research 2010;87:30-39</i>	43
Chapter 4	Erythropoietin receptor deficient mice have impaired exercise tolerance due to cardiac and muscle maladaptation <i>Submitted</i>	63
Chapter 5	Apoptosis during CABG surgery with the use of cardiopulmonary bypass is prominent in ventricular but not in atrial myocardium <i>Netherlands Heart Journal 2010;18:236-242</i>	81
<b>Part 2</b>	<b>Downstream pathways of erythropoietin: Feasible targets for intervention</b>	
Chapter 6	Estradiol-induced, endothelial progenitor cell-mediated neovascularisation in male mice with hind-limb ischemia <i>Vascular Medicine 2009;14:29-36</i>	97
Chapter 7	A pilot study on the HO-1 inducer heme arginate in non-ST-elevation myocardial infarction <i>Submitted</i>	113
Chapter 8	Heart failure-associated anaemia: Bone marrow dysfunction and response to erythropoietin <i>Accepted Journal of Molecular Medicine</i>	129
Chapter 9	Summary and future perspectives	151
	Popular summary in Dutch (Nederlandse samenvatting)	165
Supplement 1	Coloured figures	177
	Dankwoord	191
	Bibliography	197
